Title: Need to modernize railway stations in Bangalore Rural Parliamentary Constituency, Karnataka.

SHRI D.K. SURESH (BANGALORE RURAL): I would like to draw the attention of the Union Government towards the modernization of railway station in my Bangalore rural Parliamentary Constituency. During railway budget, it was announced that all the important railway stations in India would be modernized. However, after making the announcement, no steps have been taken to modernize the railway station. Bangalore is a global city. Lakhs of communters use the city railway station on a daily basis. The upgradation of Bangalore city railway station is long pending and overdue. The need for an international standard railway station is becoming extremely important.

I would like to bring to the notice of the Hon'ble Railway minister that in my Bangalore Rural parliamentary constituency, Yeshwanthapura, Aneka, Bidadi, Ramnagara and Channapatna railway stations also need to be modernized. Unless these railway stations are modernized, the vision of the Union Government to provide "Quality of life in Journeys" will remain just on paper.
